10X CONCENTRATE
*effective, versatile
enzyme cleaner*

10X CONCENTRATE PRODUCT GUIDE

10x Concentrate is environmentally friendly fermented molasses with powerful biodegradable detergents.

The product is effective and versatile, offering numerous benefits for residential, industrial and agricultural uses.

WHAT IS 10X CONCENTRATE USED FOR?

10X Concentrate probiotic cleaner has the following use cases:

- **Septic Tank Optimiser:** 10x Concentrate acts as a septic optimiser / booster, which helps to grow existing native bacteria in your septic tank. This optimises the digestion of waste, keeping the tank balanced and odour-free.
- **Household Cleaner:** 10x Concentrate is an effective non-chemical alternative for cleaning your home. It works as a probiotic surfactant cleaner, leaving no streaks on stainless steel, while also promoting septic tank health.
- **Unblocks Drains:** Grease, soap, oil, and other matter can accumulate in drains, leading to blockages, and bad smells. 10x Concentrate can effectively break down these blockages and eliminate unpleasant odours from your drains, toilets and septic tank.
- **Deodoriser:** 10x Concentrate works as a deodoriser by using natural enzymes to break down and eliminate organic molecules that cause bad odours. 10x Concentrate breaks down smelly molecules into simpler and less odorous compounds leaving behind a clean and fresh-smelling environment.

INTERESTING BENEFITS

- Easily add to a drain, toilet, bucket, sink or spray bottle
- Effectively cleans most household surfaces
- Safe to use in garden soils and may stimulate mycorrhiza growth
- Acts as a wetting agent in hydrophobic soils
- Suitable for residential, industrial & commercial applications
- Non-hazardous, non-toxic & environmentally friendly
